

# UtiliStake

**UtiliStake** manages the life cycle of your staking jobs and improves the efficiency of your construction workflow.

- > Integrates the staking process within UtiliTrak
- > Utilizes a flexible job design process
- > Integrates with your work order system
- > Includes the option to create a cost estimate for each design
- > Generates a legible and consistent staking sheet
- > Automatically posts system changes from each completed job to **UtiliTrak**
- > Eliminates double posting of information
