

Integrated Payment Solutions

PCS partners with Payment Service Network (PSN), an InvoiceCloud service, to provide the widest variety of payment options for utility customers while streamlining the remittance and billing process. Together, this solution maintains the goal of providing the most payment options to simplify your customer's life and automate payment processing.

Payment Portals: Options for all generations

- > Bank Bill Pay
- > Bank Lockbox
- > Cash Locations
- > Cashiering
- > Check 21 Scanning
- > Customer Call Center
- > Customer Web Portal
- > IVR Phone Payments
- > Kiosks
- > Mobile Phone App
- > Payment Terminal
- > Quick Pay

Seamless Integration: Exchange data to help customers and staff

PCS software is seamlessly integrated with PSN's web-based system. Integration with PSN allows the utility and utility customer to access their account balance and make an e-check or credit card payment. PCS provides a direct connection to PSN in the customer portal, phone app, customer service, and cashiering, allowing data exchange in real time. The solution adds additional payment options including Interactive Voice Response (IVR), bank bill pay options, kiosks, payment terminals, cash locations, etc. Last, the solution also supports a one-time fast payment entry directly from your website. This option, called Quick Pay, allows your customer to make a quick payment with minimal data entry.

Consolidation: 1 Deposit - 1 Posting - 1 Reconciliation

No matter where or how your customer pays, PSN consolidates all payments into one deposit. One deposit saves staff time, reduces administrative overhead, eliminates input errors, and increases cash flow speed.

Support: We are here to help

Our organization prides itself on serving both you and your utility customers. It starts with the first contact for setup. Our team will walk you through the analysis to understand your goals, provide implementation and be available for ongoing support.

PCI Compliance: Secure and worry free

PSN has attained Level 1 Certification by the Payment Card Industry - Data Security Standard (PCI-DSS), the highest degree of security awarded by the industry.

Beyond Payments: Auto-Call and Email Messaging

We understand that remittance processing is about more than a customer making a payment. Our solutions provide email messaging when bills are generated, balances are due, past due and delinquent. There are even options where customers can be called to request a payment on a past due balance. Customers are empowered to select the notification levels they desire and how they want to be notified.

How many ways would you like to offer your customers to pay?

Check all that apply

Bank Bill Pay
